HOW TO USE THE DIRECTORY

The Residence Directory

Alphabetical Arrangement

This is the mose valuable part of any directory.

It contains a list of prospective buyers.

About ninety per cent of these listings have average buying ability or better.

We not only show what the employment is but **where.**

We group all members of one family living at one address.

Our information on rural addresses is in the same form as city listings.

Many of the above features are not found in books of this kind.

This entire book is on the loose leaf plan and may be extended at will to suit individual purposes.

Our Advertisers

It will be noted that these are all old established firms of character and responsibility.

This book could not be made without their cooperation.

It should not be assumed that Non Advertisers were not interested as only a limited amount of solicitation was made.

The Street Directory

This part of the book is used when the location is known but not the occupant.

The information so found can then be checked against the alphabetical list for fuller information.

This part is used in making deliveries or canvassing.

Telephone Directory

This part of the book has many uses but USE THE TELEPHONE BOOK WHEN MAKING CALLS.

When the only information is a telephone number it may be quickly located here.

Further information can then be found in the usual manner.

Classified Directory

A List of Those Who Serve and Sell

Contains much information that is not available elsewhere.
